**The 1st World Congress on Controversies in
Gastroenterology and Liver Diseases (C-Gold)**

Description:

This controversies Congress stems from the fact that current congresses fail to promote true clinical discussion between practicing physicians and researchers on unresolved pressing issues.

Allowing ample time for speaker-audience discussion, the congress aims at reaching up-to-date and agreed-upon answers to ongoing debates even when proof is lacking, through evidence-based medicine and expert opinion.

The purpose of the C-Gold Congresses is to disseminate information in our field by debating the multiple controversial issues and reaching consensus when possible.

We invite you to take part in The First World Congress on Controversies in Gastroenterology and Liver Disease (C-Gold) which will be a milestone for future congresses.

Country: Germany

City/Suburb: Berlin
