**6th International Conference on Applied
Financial Economics**

Description:

The aim of 6th AFE Conference is to bring together academicians and practitioners with research interests in the field of finance, accounting and business management. The conference provides a forum for disseminating new research findings, practices and techniques in finance and exchanging ideas among academicians and practitioners to promote a better understanding of contemporary issues and solutions to the challenges in the region's financial markets and economies. This conference would encourage the young generation to pursue research interests in the areas of business and finance.

Academicians and researchers are invited to share their unpublished research findings in all areas mentioned below:

accounting,
banking control and supervision,
finance, management,
financial economics

Possible topics for submission include, but are not limited to:
