

3rd Annual Ultra High-rise Building Summit 2010

Description:

3rd Annual Ultra High-rise Building Summit 2010 will be co-organized by JFPS Group and ECADI. The 3rd annual summit with the theme of "Building the world class safe and green skyscrapers, promoting sustainable development of ultra high-rise buildings" will provide the best communication platform for the developers and constructors, which aims to be the largest and most professional event in this industry.

During the 2-day summit, the hot issues will include:

1. World Leading Architects'™ designing concept and the global ultra high-rise building's™ designing trend
2. Ultra High-rise Building's™ planning & construction in CBD (Central Business Center)
3. Seismic design and fire safety for ultra high-rise buildings
4. Utilizing the MEP allocation of building systems for energy saving
5. Promoting green building certification and building sustainable skyscrapers

25 Honorable speakers are coming from: Adrian Smith + Gordon Gill, KPFF, Pelli Clarke Pelli Architects, Aedas, Hyder Consulting, Shui On Land Limited, Thornton Tomasetti, Arup, Parsons Brinckerhoff, RMJM, Shanghai Tower Construction & Development Co., Ltd, East China Architectural Design & Research Institute, Poly Property, Hang Lung Properties!

Besides the speech and panel discussion, there will be 8 round-table discussions tailored-made for different technology experts and technology & solution vendors which provide a more professional communication platform for all the construction shareholders.
